

## **2.S - Criterion 2 - Summary**

---

The institution acts with integrity; its conduct is ethical and responsible.

### **Summary**

---

Integrity is highly valued at Iowa State, among both people and programs, in keeping with the mission of a public, land grant university.

ISU's integrity begins with the Iowa Board of Regents, which effectively governs the state's public higher education programs.

Institutional integrity is the result of clear policies, protocols, and practices; communication of these imperatives to students, faculty, and staff; and transparency both inside and outside the university.
